A2Z Diagnostics, LLC Provides Notice of Data Security Incident

A2Z Diagnostics, LLC (“A2Z”) is committed to maintaining the privacy and security of personal information it maintains. A2Z recently notified individuals of a data security incident involving access to certain employee email accounts by unauthorized third parties.

Upon learning of this issue, A2Z promptly secured the impacted email accounts and launched an immediate investigation in consultation with outside cybersecurity professionals who regularly investigate and analyze these types of situations to analyze the extent of any compromise of the email accounts and the security of the emails and attachments contained within them. After an extensive forensic investigation and comprehensive and time-consuming manual document review, A2Z discovered on June 28, 2021 that one or more of the email accounts accessed between February 2, 2021 and April 2, 2021 contained identifiable personal and/or protected health information. A2Z has no evidence to suggest that any data has been misused or acquired. However, out of an abundance of caution, A2Z is issuing notices to anyone whose information may have been contained in the accessed accounts.

The accessed email accounts contained the personal and protected health information of certain individuals who had laboratory testing performed by A2Z, including their full name and one or more of the following: Social Security number, date of birth, driver's license or state identification number, medical diagnosis or clinical information, treatment type or location, doctor name, health insurance information and/or medical procedure information. This incident does not affect all individuals who received testing by A2Z.

Beginning on July 28, 2021, A2Z mailed notification letters to each affected individual for whom it has enough information to determine a physical address. Notified individuals should monitor insurance statements for any transactions related to care or services that have not actually been received. For the very limited number of individuals whose Social Security numbers were impacted, complimentary credit monitoring has been offered.

Since the date of this incident, A2Z has taken significant measures to improve its technical safeguards in order to minimize the risk of a similar incident in the future, including enhancement of its multi-factor authentication software.

For further questions or additional information regarding this incident, or to determine if you may be impacted, A2Z has set up a dedicated toll-free response line for individuals to ask questions. The response line can be contacted at 866-991-0871 and is available Monday through Friday, 8 a.m. to 8 p.m., Central Time.
